EDUCATION

Bachelor of Computer Science

Jan 2016 - Jan 2020 | Sahiwal

F.S.c Pre-Engineering

Jun 2013 - Jun 2015 | Nankana Sahib

Passionate Software Engineer with 3+ years of experience in .NET Core, specializing in MVC design patterns and API development. Strong background in developing innovative web applications that deliver exceptional user experiences. Adept at software architecture, efficient coding practices, and turning complex ideas into elegant solutions.

WORK EXPERIENCE

Software Engineer

NanoByte Technologies | Lahore, Punjab

Jan 2023 - Present

TNT Agent App | Real Estate Agent Management System

Role: Backend Developer

Led the development of RESTful APIs for a real estate agent management application. The system featured comprehensive functionality for registering agents, managing their staff members, tracking leads, and implementing a robust calendar/event management system. The API architecture supported seamless synchronization across multiple platforms, ensuring real-time data access for agents on the go.

Tech: .NET Core 7, REST API, EF Core, JWT Auth, SQL Server, Azure

BrandHub & OrderManager | Warehouse & Order Management Systems

Role: Full Stack Developer

Developed QA portal for warehouse operations and enhanced Order Manager system with Helpdesk API integration and improved shipment procedures. Implemented Azure authentication and custom features for enhanced UX.

Tech: .NET Core 7, MVC, Repository Pattern, ADO.NET, SQL Server, REST API

Brandhub MWA | Cross-Platform Mobile App

Role: Full Stack Developer

Created cross-platform mobile app for order management with real-time tracking, order creation, and status updates. Ensured data synchronization between mobile and web applications.

Tech: .NET MAUI, MVVM, Xamarin.Forms, RESTful API, Azure AD B2C, EF Core

Associate Software Engineer

2B Vision Technologies | Lahore, Punjab

Oct 2021 - Dec 2022 (1 year 3 months)

TheMyriad

Role: Full Stack Developer

Developed hostel management system for overseas students with online registration and service booking. Integrated access control system.

Tech: C#, MVC 5, Repository Pattern, Entity Framework, SQL Server

Payroll

Payroll Management System

Role: Backend Developer

A payroll management system specifically designed and developed for US market based on US laws for SMEs.

Tools & Technologies: C#, MVC 5, Repository Pattern, Unit of Work, Entity Framework, SQL Server.

Software Intern

Techesthethe | Johar Town, Lahore

Jul 2021 - Sep 2021
